LA TENUTA PRAPIAN

Prapian estate is located in the heart of Treviso hills, where the wine is merged with art and culture everlastingly at the highest level. The respect of the unique mix of this ideal soil, the experience that can be breathed in the air, the will of being always innovative are the expression of Prapian distinctive character.

The attention and diligence in the work, the tradition as root of a constant development, the management and productive flexibility, can be seen in the form of walls, vineyards, trails, land and sky, merged in a unique way.

The estate spreads over 45 hectares in the DOCG Valdobbiadene area and for 20 hectares in the DOCG Asolo – Nervesa area. The company was built following the modern principles, born to evolve, keeping in mind the roots of the land and of the family.

3 VOLTE

The path turns 3 TIMES (3 VOLTE) climbing steeply to the Prapian estates on Montello, along the “Presa 3” of the sunny south side. For us, “3” is the lucky number of this fresh and fragrant Prosecco Asolo DOCG, the result of rigorous organic viticulture and skillful winemaking.

COL DE L’UTIA

This terroir, which has taken shape over the centuries thanks to the hard work of many generations, is home to the grapes of the wines of the future. The Prapian vineyards, nestling in the hills of the Tarzo and Valdobbiadene DOCG area, give us COL DE L’UTIA sparkling wines (an ancient word in the Ladin language meaning chalet or refuge). These Prosecco wines of proven excellence have a sophisticated, elegant and austere image, the result of strict organic production and skillful winemaking.

3 VOLTE

The ancient paths that cross the Montello along the north-south axis are called “prese” from the times of the Serenissima Republic of Venice. Along the PRESA N° 3°, in the southern slope, the Prapian estates give life to a fresh and perfumed Prosecco Asolo DOCG, the result of rigorous organic viticulture and skilful vinification.

PRAPIAN AREA

Area Conegliano/ Valdobbiadene - TARZO (TV)

<https://goo.gl/maps/amUxitiJUmQ2>

Conegliano-Valdobbiadene is a hill country in the Treviso area, 50 km far from Venice and approximately 100 km from the Dolomites. Here is Tarzo, a little town in the Docg Prosecco Valdobbiadene Production area, with its large number of water streams crossing the wide wood.

The hills extend from East to West: a slope facing south where vineyards have a better exposure to the sun, a slope facing north surrounded by the wood.

The elevation varies from 100 mt to 500 mt and the temperature is perfect for wine flavors development. This particular position grants a mild and ventilated climate that helps grapes to get dry quickly after rain.

The ancient origin of this soil dates back to the rise of sea and lacustrine bottom. Some hills were reshaped by Dolomites 'glaciers that moved a lot of sediments down the valley; in the remaining area the soil has a sea origin and is rich of marls and sandstones elements. The coexistence of different type of soil involves a different configuration of hills, more pleasant in the Conegliano Area and steeper and totally exposed in the Valdobbiadene area.

Hills of Conegliano – Valdobbiadene recognition as UNESCO World Heritage Site: Prapian is one of the most characteristic terroir of the Tarzo – Valdobbiadene hills, that have been designated a UNESCO World Heritage Site. It is in the core zone, namely the area which produces great valuable wines, thanks to its slopes.

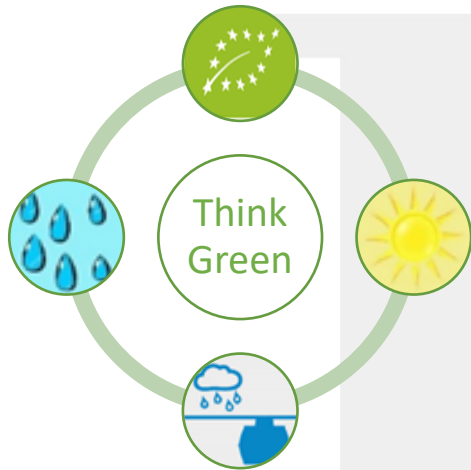

Area Colli Asolani – NERVESA DELLA BATTAGLIA (TV)

<https://goo.gl/maps/HHQxY8WukUs>

The Colli Asolani Production area is in the province of Treviso, at the bottom of Dolomites, between Nervesa Della Battaglia and Fonte. Strongly distinctive are slopes and curves that give a harmonic and pleasant view.

The hills are mainly rocky surrounded by a sandy, clayey, marly soil, with its typical reddish colour.

THINK GREEN!

Prapian Company is engaged in a steady research of continuous developments for environmental protection and for the use of renewable sources.

ORGANIC PRODUCTION - ORGANIC CONFORMITY CERTIFICATION NR.
ITBIO015-S15

Organic Wine is a product that comes from an agriculture method that follows a specific Regulation, using grapes grown only with organic agriculture methods, with no chemicals and Ogm. This means that organic fertilizer can be used for the ground fertilization and parasites are struggled by a well-balanced fertilization, an animal origin treatment and biological control. The vinification process is based on procedures authorized by regulation 203/2012, that doesn't allow the addition of chemicals for wine improvement. The most

important measure is the maximum quantity of sulphites that organic wine can contain: 100 mg/l for red wine and 150 mg/l for white and rosé wine.

In Prapian estate the whole vineyard is grown following Organic Agriculture methods, that means:

- No synthetic chemicals or genetically modified organisms (GMOs);
- Use of organic fertilizer;
- As crops' protection from pests preventive actions have been arranged for vineyards reinforcement (f.i. well-balanced fertilization), directly by anti-parasites treatments of natural origin (such as copper, sulphur, plants' extracts, ...) or by biological control (use of living organisms that are parasites' antagonists). Besides the winemaking process and the oenological products are the one authorized by Regulation 203/2012, forbidding the addiction of chemicals commonly used for wine correction.

PHOTOVOLTAIC PANELS: panels that capture solar energy and convert it into electric energy through photovoltaic effect;

WATER RECOVERY AND REUSE TANK: tanks that recover reusable water for irrigation.

THINK GREEN

Un basso impatto ambientale per grandi risultati enologici.

THINK GREEN

Bio è passare dal concetto di qualità al concetto di equilibrio.

THINK GREEN

Genius loci, ovvero adattarsi al territorio prima di tutto.

THINK GREEN

La viticoltura biologica per conciliare natura e salute.

THINK GREEN

Non solo ecologia e mercato: lavoriamo per un'agricoltura migliore.

THINK GREEN

Differenziamo gli interventi per ridurli al minimo.

THINK GREEN

Trattiamo la Terra esattamente per quello che è. Terra.

THINK GREEN

Preserviamo le qualità naturali del terreno.

THINK GREEN

Il biologico è l'evoluzione naturale della viticoltura.

THINK GREEN

Il controllo biologico al posto della chimica.

THINK GREEN

Il risultato è importante quanto il modo di raggiungerlo.

THINK GREEN

THINK GREEN

Vendemmia manuale, nel rispetto della natura e delle persone.

THINK GREEN

Ci impegnamo in ricerca e sviluppo per la salvaguardia dell'ambiente.

THINK GREEN

Adattarsi al terreno, anziché adattare il terreno alle proprie esigenze.

THINK GREEN

La coltura biologica è una cultura proiettata al futuro.

THINK GREEN

Conciliare la produttività con la salvaguardia dell'ambiente.

THINK GREEN

Difendiamo le viti rinforzandole con metodi naturali.
